

# Problem 02

# Requirements to implement

Write a program in `C` language capable of performing the 4 operations between two real numbers entered from the keyboard.

After the two numbers, called  $A$  and  $B$ , have been entered, the program must display the four values  $A + B$ ,  $A - B$ ,  $A \cdot B$  and  $\frac{A}{B}$ .

Assume that  $B \neq 0$ .
